EXECUTIVE SUMMARY

Cryptocurrency is a digital or virtual currency that is designed to function as a medium of exchange. It uses cryptography to secure and verify transactions and to control the creation of new units of a particular cryptocurrency. Basically, a cryptocurrency is a limited entry in a database that cannot be changed unless certain conditions are met.

There have been many attempts to create digital currencies during the boom of the 90s technology, with systems such as Flooz, Beenz and DigiCash appearing on the market but certainly failed. There are many different reasons for their failures, such as fraud, financial problems and even friction between company employees and their bosses.

In particular, all of these systems use the Trusted Third Party approach, which means that the company behind them verifies and facilitates transactions. Because of the failure of these companies, the creation of a digital money system was seen as a cause that was lost for a long time.

Then, in early 2009, an anonymous programmer or group of programmers under the alias Satoshi Nakamoto introduced Bitcoin. Satoshi described it as a peer-to-peer electronic cash system. ' This is fully decentralized, meaning that no server is involved and there is no central control authority. This concept is very similar to peer-to-peer networks for sharing files.

In our opinion a new invention or technology will be easily accepted if the invention or technology is able to provide benefits that can be felt directly by all levels of society. Almost everyone now knows Bitcoin and Altcoin, but only a few people understand the benefits that can be provided with the existence of products from Cryptography and Blockchain technology. We believe that if the benefits of all products produced from Cryptography and Blockchain technology can be felt directly by all levels of society, the growth rate of Cryptotoken users worldwide will increase sharply.

ADSX SOLUTION

We have a vision to build a crypto token ecosystem that can facilitate transactions related to the purchase secondary needs and luxury goods needs with an online payment system. with just one click at cost of only \$ 0.0000009. In addition, these transactions without having to go through a financial institution and not subject to administrative fees for each month. Then for ADSX holders will get rewards coins, vouchers, secondary goods and luxury goods.

ADSX ECOSYSTEM

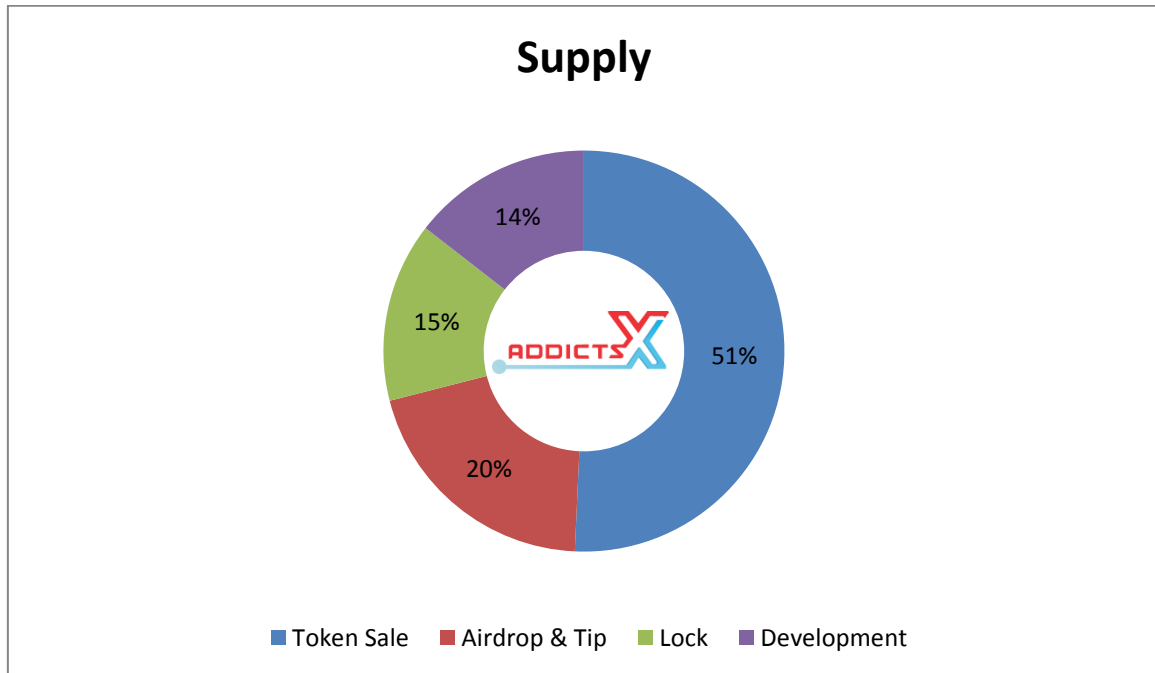

ADSX Marketplace

We will make our own market which is available in the market for vouchers, secondary goods and luxury goods. Payment in adsx marketplace can use adsx tokens. Then we will also add payments using btc, eth, and xlm.

everyone will be able to register at the adsx marketplace. the requirements that are used to register in the adsx marketplace are also quite easy that is by using only e-mail, cellphone number, and National ID or Passport. besides that adsx marketplace also offers various types of secondary and luxury goods.

Goods available not only from domestic but also from abroad. Because next we will target buyer adsx or users adsx marketplace not only from domestic. Then for the price of goods it will be the same as other marketplaces or there will be cheaper ones.

ADSX DISTRIBUTION TOKEN

We make 69.000.000 ADSX Tokens on the Stellar Blockchain Network where 71% of the total supply will be distributed to each ADSX member.

- Airdrop and Papaya Tips

We provide 14.000.000 (20%) tokens for new members and fill in the requirements needed in the Google Form.

- Token Sale

We have prepared 35.000.000 (51%) tokens for token sale and can be purchased at the SDEX market such as stellarport, interstellar and stellarx.

- Lock

10.000.000 (15%) of the number of tokens allocated to lock and to stabilize the market.

- Development

10.000.000 (14%) tokens allocated for development.

ROADMAP

TEAM

Name	Description
Sarjito Founder and CEO	Sarjito is experienced 2 years as community manager and blockchain advice LinkedIn .
Ryan Gustian Co-founder and COO	Ryan is Experienced 2 years a professional trader and Creator the biggest airdrop group in Indonesia LinkedIn .
Rieztu Pribadi Web Development and apps development	Rieztu is Experienced 4 years in web development and apps development LinkedIn .
M. Arbi Web Development	Arbi is experienced 2 years in web development and experienced 1 years as ico marketing LinkedIn .
Dyah Mirta Marketing	Dyah is experienced 1 years as marketing in some initial coin offering LinkedIn .
M. Indra. F Advisor	Indra is experienced 1 years as ICO hunter and blockchain advice in some initial coin offering LinkedIn .
